

# PT. ALBANY ENGINEERING SERVICES

# FIELD SERVICE DIVISION

## OUR VISION

To be a Leader Service Provider and Repair Facility  
in the Power Generation, Oil & Gas Industries

## OUR MISSION

To Provide a Superior Product and Level of Service  
by Employing the Best Resource Available Thereby  
Exceeding Customer's Expectation

# PT. Albany Engineering Services (AES)

PT. Albany Engineering Services (AES) is a fully independent service and contracting company operating in the power generation and industrial sectors. We deliver specialized technical expertise in:

- Field service & overhaul
- Component repair and refurbishment
- Engineering consulting & project oversight
- Contract and commissioning support

Whether for steam turbines, gas turbines, generators, compressors, or rotating equipment, Albany is your partner in uptime, performance, and operational reliability.

**4**

## SPECIALIZED MANPOWER & TRAINING

- Skilled Craft Labor Provision
- Workforce Planning & Supervision
- Contract Review & Legal Permitting Support
- On-Site Training & Development
- HSE-Compliant Work Execution

# Project Delivery Strategy

## Structured Work Packages

We manage our projects using carefully developed work packages — documents that define each critical activity, accompanied by:

- Process steps and quality checks
- Material traceability
- Engineering references
- Final inspection points
- Multi-level sign-off requirements

This ensures accountability, traceability, and consistent quality across every stage of execution.

## End-to-End Project Coverage

From RFQ to Handover, we deliver:

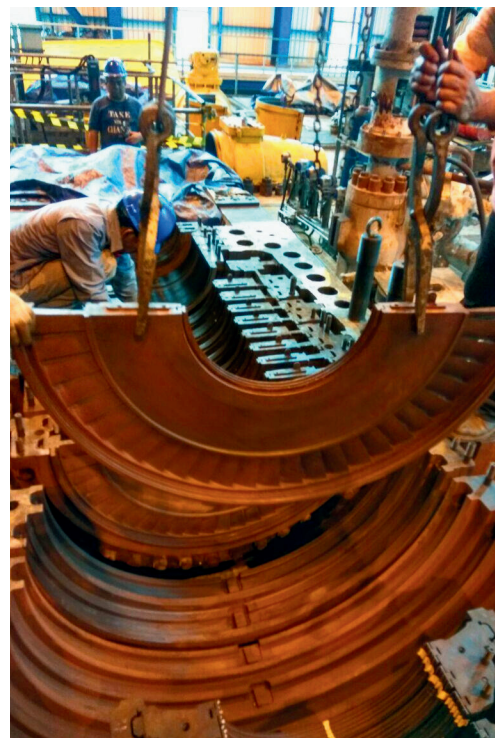

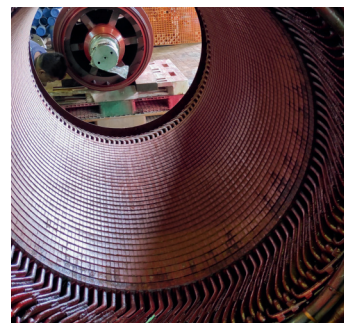

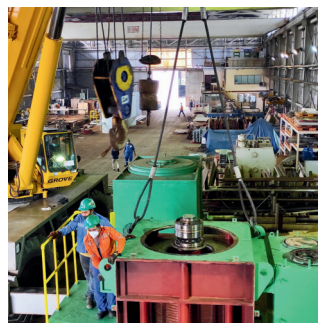

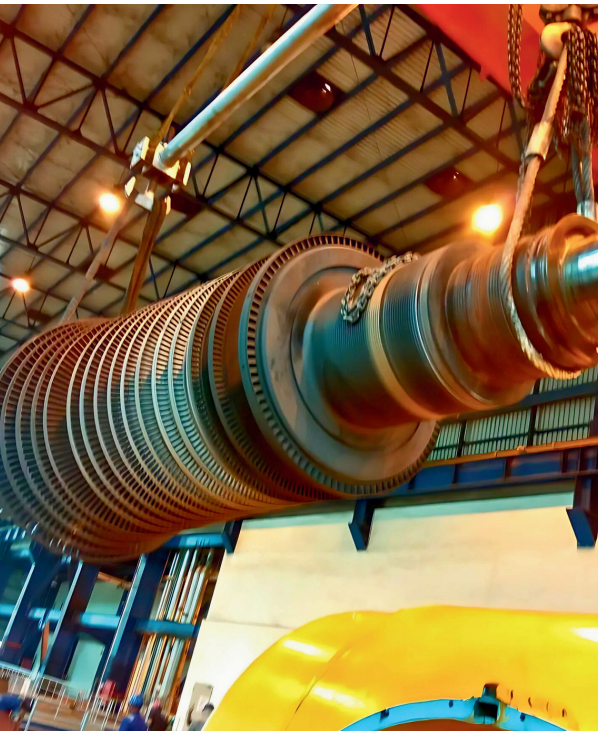

- Pre-outage planning & work package development
- On-site execution with technical oversight
- Documentation, reporting, and QA sign-offs
- Post-outage review and performance tuning

# Portfolio

PT. Albany Engineering Services has successfully delivered field service solutions for leading energy and industrial clients across Indonesia, including PT PJB Muara Karang, PLN Sibalang, and PT Indonesia Power.
